Iraq

Position Title: Mechanic Instrument Control Senior Repairer

Qualifications & Competencies:

This is a position with a physical rating of heavy. Must have a minimum of three (3) years electro-optical maintenance and repair to ground ordinance laser and night vision devices, small missiles systems, and other fire control equipment. Must have a current Secret Security Clearance. Must have a U.S. passport. Must be able to pass a physical exam due to the harsh living and working conditions. Must also pass a pre-employment criminal background check and drug screen. This is a one (1) year assignment. You should expect to work 12 hours days, seven days a week.

Salary: \$86,000 income potential with competitive benefits package.

Key Responsibilities:

- Diagnoses and repairs malfunctions of armament, electrical, instrument, and fire control systems and components including solid state and transistorized subsystems.
- Performs maintenance, authorized modifications and alignment fire control units, sighting elements, electronic and mechanical devices, and instruments.
- Performs operational checks, ammunition loading/unloading and weapon subsystems configuration changes.
- Test/troubleshoots and repairs test sets and diagnostic equipment.
- Requisitions and maintains shop and bench stock for repair of electrical, instrument, and fire control systems.
- Uses and performs operator maintenance on common and special tools.
- Maintains records on weapons and subsystems.
- Performs mechanical, mechanical-optical and electrical repairs to include inspecting, troubleshooting and adjusting fire control instruments and systems.
- Completes basic shop administrative forms and records using technical publications.
- Observes and follows all safety rules and procedures, including wearing required personal safety equipment.
