Iraq

Position Title: **Communications (COMM/EL) Technician**

Qualifications & Competencies:

This is a position with a physical rating of heavy. Must have a minimum of three (3) years experience in the Electronic Maintenance Field. Personnel with an operator level communication background do not qualify for this position. Qualified personnel must have extensive experience with TMDE, to include AN/GRM-122, NVG test set, multimeters, oscilloscopes and spectrum analyzers. They must be able to navigate through and understand the use of complex Army technical manuals. Must have a U.S. Passport and a current Secret Service Clearance. Must be able to pass a physical exam due to the harsh living and working conditions. Must pass a pre-employment criminal background check and drug screen. This is a one (1) year assignment. You should expect to work 12 hours days, seven days a week.

Salary: \$86,000 income potential with competitive benefits package.

Key Responsibilities:

- Performs direct support and general support (DS/GS) level maintenance of radios receivers, transmitters, COMSEC equipment and other associated equipment.
- Performs difficult or complex repairs of defective components, subassemblies, and related cabling.
- Must be able to use test, measurement and diagnostic equipment (TMDE), i.e. AN/GRM-122 Radio Test Set, to determine the cause and location of malfunctions, extent of faults and the level of maintenance required.
- Repairs systems, replaces defective components and performs bench test to verify operations of repaired equipment. Must also be able to perform preventive maintenance on TMDE and tools.
- Performs direct and general support (DS/GS) level maintenance and repair on special electronic devices, including: night vision equipment, mine detectors, scattering systems, electronic distance and azimuth orienting devices, battlefield illuminations devices, electronic azimuth determining devices, and nuclear, biological, chemical (NBC) warning and measuring devices.
